## INFORMAL SCIENCE EDUCATION AND PUBLIC ENGAGEMENT

### FORMAL K-12 EDUCATION

**Florida Coastal Everglades LTER Schoolyard:** Between 2007-2021, I supervised the K-12 education and outreach program that includes a Research Experience program, where I have served as mentor of high school students and teachers.

**Research Experiences for High School Students:** Between 2007-2021, I provided research opportunities for high school students in my research lab including through near-peer mentoring, resulting in placements in the Intel International Science Fair, several university scholarships, and one peer-reviewed publication (Sanchez et al. 2013).

- 2010-2012 Chris Sanchez – “Exploring siliceous microfossils as a tool for inferring past water level and hydroperiod in Everglades marshes.” First Place Botany Intel International Science Fair. Published results.
- 2014-2016 Sara Osorio – “Effects of coastal drainage restoration on diatom assemblages.” First Place Botany Regional Science Fair.

**Research Experiences for Teachers:** Between 2007-2021, I provided research opportunities for teachers in my laboratory resulting in Everglades-based lesson plans using Long Term Ecological Research Network data.
